

RITA - Radiological Institute for Technical Assistance

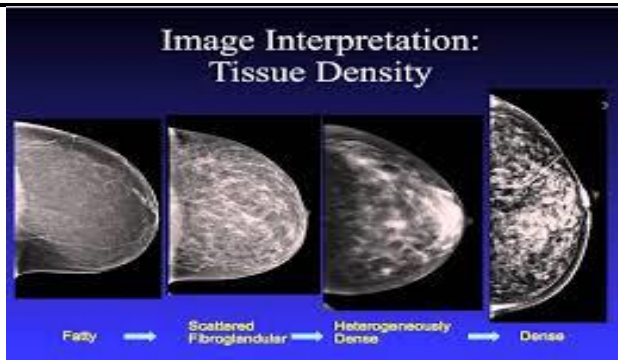

Mammography and MR – Breast

Course Director: Dr. Rita Dhruv, MD., DMRD.
Company- Prabhat Telesolutions LLP
Institute- Radiological Interpretation for Technical Assistance (RITA).

Course Date
December- 2018- 8th and 9th (Sat - Sun.)

Course Review

This two-day course is designed to provide practicing radiologists with an intensive, hands-on experience in reading mammography and breast MR. Throughout this program, participants will develop their interpretive skills through extensive case reviews at individual workstations. In addition, MRI-guided biopsy presentation will provide training in accurate and safe MRI-guided biopsy techniques.

Program Objectives

At the conclusion of this course, participants will be able to:

- Assess the clinical role of mammography and breast MRI in patient selection and in improved detection, diagnosis and treatment of breast disease.
- Interpret imaging protocols and techniques to produce high quality mammography and breast MR images in keeping with current recommended standard.
- Accurately and efficiently interpret and report on mammography and breast MR exams in accordance with the BI-RADS®.
- Utilize breast MR-guided biopsy tools effectively and safely.
